Dear FCC, I am a truck-driver and a subscriber to xm radio. First of all i am very happy with the whole xm format, but one very important and i think necessary addition to the xm programing is the 24 hr traffic and wheather reports. Had i been listening to my xm a couple of months ago, i would not of gotten stuck on I80 near chicago for five hours, causing me to run out of hours right there on the freeway just 35 milrs from my destination. I think it would be a great loss and disapointment to have this service unlawfully just taken away from us. The advantage is that i can get up to the minute reports, clear as a bell, from anywhere in the united states, which helps me plan my trips. If this service, and xm is taken away, i think this whole country can be considered a loss. After all, isn't this the exact type of thing that our men and women have been fighting for?

Thank-you: Michael P. Aura
